# PIB

(Patient Information  
Board)

---

Display Solution for healthcare  
facilities.

Patient Name	
<b>Go C Y</b>	
Consultant-in-Charge	
<b>Pauline Neow Mof (Jstcs)</b>	
Language	English
Patient Location	
Diet	Therapeutic Diet Enabled >
Special Precautions	Special Precautions Enabled >
Nurse Entry	

## What Is PIB?

Patient Information Board (PIB) is a display solution for administrative and clinical information in healthcare facilities.

The system is designed to operate on Android tablets located in within the hospital premises.

PIB interfaces with Real-Time Location System to display the real-time patient location.

In addition, Nurse Entry module is incorporated into PIB to allow nurses to view nurse notes.

## What to Include?

- Display between male patient and female patient by different colours.
- Patient prefer language.
- Patient location.
- Patient's detailed diet including food allergies.
- Details special precautions on patient and other information to take note.
- View Nurse Entry entered by on duty nurses.

## What more?

Five enable/disable simple icons serving as a quick, “intuitive” representation of primary care provider, drug allergy, telemetry, infection control and fall precaution.

### 1. Primary care Provider

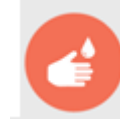

### 2. Drug Allergy

### 3. Telemetry

### 4. Infection Control

### 5. Fall Precaution

## Key Offerings

PIB allows nurse to track entries made by duty nurses and doctors. It also provide patient general information and tracks allergies for both food and medicinal use.
